

The key objectives of Slapton Parish Council with regard to highways are as follows:

1. **Oversized vehicles:** Prevent congestion and damage to property caused by vehicles, including caravans, motorhomes and oversized vehicles (i.e. over 7.5 tonnes), ignoring existing signage and getting 'stuck' in the narrow village roads.
2. **Speed:** Reduce the speed of vehicles entering the village, in particular, at the brow of the hill by Slapton Sands Campsite and the Village Park and Walk car park on Sands Road (where the speed limit is 60mph but changes to 20mph after the Village Park and Walk).
3. **Speed:** Ensure that all vehicles adhere to the 20mph limit so that other road users remain safe, especially at the outer edges of the village on Sands Road, Blacksmiths Hill and Prospect Hill.
